INTRODUCTION

In Ambra, Benito Garozzo has solved the dilema on what to open with 16 HCP and a 5card major in a balanced hand. Many partnerships open 1NT nowadays with 5M-3-3-2 distribution, but in Ambra we open 1♠/♥ and we can control the bidding with the many relays available.

Outlay of the system is basically Dutch Doubleton, 2-over-1 (2/1) system:
1♣: 2+ card, 10-22 HCP
1♦: 4+ card, 10-22 HCP
1♥♠: 5+ card, 10-21 HCP
1N: 15-17, balanced, 5card minor possible
2♣: 20+, GF without 5card major
2♦: a) weak 2♥
     b) GF with 5+ card ♥
2♥: a) weak 2♠
     b) GF with 5+ card ♠
2N: 21-22, balanced, 5card major possible
3N: gambling

Ambra also solves the well known 2/1 dilema: is 2/1 GF or GF unless responder rebids his suit. In Ambra a 2/1 (e.g. 1♥-2♣) is GF unless responder rebids his suit. You might ask "how should responder bid with a GF hand and a long ♣ suit?". Initialy responder bids 2♣ and on his second round he has many relays available to force the auction.

In Ambra practically all 2♣, 2♦ and 2NT bids have artificial meanings. In practice these 3 contracts are very unpopular as end contracts, so we might as well use them for relays etc.

But the main "selling point" for Ambra is it's slam bidding. Very often a Slam Invite (SI) can be established at a very low level. Slam bidding specifically is an area where the Italian top players excell and the Dutch top players have been critised.

1§ opening

With two or three 4card suits, the lowest suit is opened.
Over 1♣ we play the Walsh convention: responder bids a 4card major bypassing a 4+ ♦ suit and 5-9 HCP. With 10+ HCP a 4+card ♦ suit is bid first.
The 1NT response is weaker than in most agreements: 5-10 HCP with 4/5 ♣ or 4/5 ♦ (with 6 ♦ the response is 1♦).
2♣ is inverted minor: 4+♣ and 11+ HCP.
2♦♥ are similar to the 2♦♥ opening: transfer and either weak (2-7) or strong (12+).
2♠ shows 5♣, 2NT shows 6♣ and 2-6 HCP, 3♣ also shows 6♣ but stronger: 8-10 HCP.
3♦ is preemptive: 7+♦, 3-8 HCP. 3♥♠ are splinters with 5-4 in the minors, GF.
3NT is natural: 12-14 HCP and 3-3-3-4 distribution.

Let us look at the development after 1♣-1♦:
Opener's rebid is all natural with the exception of the cheapest reverse bid: 2♥ in this case. 2♥ has 3 possible meanings:
      a) 5+♣ - 4♥, 17+ HCP, a normal reverse
      b) 6+♣ and 17+ HCP
      c) 5+♣ - 4♦, 17+ HCP, a strong ♦ raise
This principle of giving multiple meaning to the lowest strong bid occurs frequently in Ambra. It has the advantage of keeping other bids very simple and with relays responder has plenty of room to find out which hand opener has.
That means that the rebid of 3♣♦ can be weker now: 13-16 HCP and 6♣ or 4♦ support respectively.
Double jumps by opener are splinters, showing 4-4-4-1 distribution and 18-22 HCP (3NT is singleton ♦).
1♣-1♦, 2♥-2♠ is a GF relay, opener rebids natural in the context of the bidding thusfar:
      2N: 5+♣-4♥ (3♣=GAR, see below)
      3♣: 6+♣
      3♦: 5♣-4♦
      3♥: 6♣-5♥
      3♠: 5♣-4♥-4♠

GAR is a convention used widely in the system. Whenever opener or responder shows a 5-4 distribution, 2NT is relay asking clarification. Responses are: 3♣ shows 5-4, 3♦ shows 6-4. In case 5-5 and 5-4-4 distributions are still possible

too: 3♥ shows 5-5 and high singleton, 3♠ shows 5-5 and low singleton and 3NT shows 5-4-4. After the responses of 3♣ and 3♦, partner can bid:

    1st step: a further general relay
    2nd step: fixes the higher suit, relay

The responses to these relays are: 1st step: 2-2 in remaining suits, 2nd step: high singleton, 3rd step: low singleton. After the sequence above: 1♣-1♦, 2♥-2♠, 2N GAR cannot be invoked with 2N, so we must use 3♣ and all subsequent bidding is 1 step higher.

When opener has not limited his hand yet, the GAR convention works a bit different:

    3♣: 5-4, 11-15
    3♦: 6-4, 11-21
    3♥: 5-4-2-2, 16-21
    3♠: 5-4, high singleton, 16-21
    3N: 5-4, low singleton, 16-21

After the 3♦ response, 3♥ is a further relay:

    3♠: min, high sin
    3N: min, low sin
    4♣: max, high sin
    4♦: max, low sin

Keep in mind that the 2NT bidder is attempting game, opposite a minimum a partscore is still possible. I am not sure what 'GAR' means, possibly something Italian, but it would be a suitable abbreviation for 'Game Attempt Relay'.

Transfers are used after a 2NT rebid by opener. Let us say the bidding started 1♣-1♥, 2N promising 18-20 HCP and forcing. The bid below responder's suit is now transfer: 3♦. Opener must bid 3♥ and reponder continues natural: passing with 5♥ and 4-5 HCP. Other bids by responder are SI. When opener's suit is not ♣, there is room for transfers to both our suits:

1♦-1♥, 2N-3♣: transfer to ♦
       -3♦: transfer to ♥

Ambra also uses an extended Checkback convention after a 1NT rebid by opener. Let's say the auction started 1♣-1♥, 1N. Responder's 2♣ is now a puppet to 2♦ and used for hands with weak ♦ or any game invite. 2♦ over 1N is a relay with any GF hand. That results in the following response structure after 1♣-1♥, 1N:

    2♣: puppet to 2♦
    2♦: Checkback, GF
    2♥: 5+♥, 7-10 HCP
    2♠: 4♥-4♠, 10-12 HCP
    2N: puppet to 3♣, see below
    3♣♦: 5+ suit, GI
    3♥: good 6+ card, GF
    3♠: 6♥-5♠, GF
    3N: to play
    4♣: Gerber

Bidding after the 2♣ puppet is natural: reponder passes with weak ♦ and other bids are GI.

Over the GF Checkback, opener is required to show: a 4card on the other major, 3card support for responder's major, rebid a 6card suit, show a 5-4 hand or bid 2NT, in this order.

This puppet and Checkback is also used after 1♣-1♦, 1N and 1♥-1♠, 1N.

After opener rebids on the 1-level, 2♣ by responder is a relay, this is known in the USA as the x-y-z convention. For details, see the 2♣Relay discussion later. A beautiful slam example from a practice game follows here:

Axxx	Kxx
AJ	KQxx
9xxx	AKQx
A10x	xx

1♦	1♥
1♠	2♣:r, GI+
2♥:min,NO ♥ supp	2♠r, SI
2nt	3♦:agrees ♦
3♥:q	3♠:q
3nt	4♦:turbo, 2 keycards
6♦:good controls	pas

Support structure.

As is common nowadays, over a 1♥/♠ opening, responder has many ways for raising partner. Let us say partner opened 1♥:

With 3 card support or a 4card and bad (=4-3-3-3) distribution:
-    3-7 HCP: bid 2♦ first, artificial (can also be GF with ♦ suit) and pass if opener rebids 2♥
-    8-9 HCP: raise to 2♥
-    10-11 HCP: bid 3♣, artificial
-    12+ HCP: bid your own suit first and support ♥ later

With a 4 or 5card card support:
-    0-5 HCP: preempt with 3♥ (4card) or 4♥ (5card)
-    6-9 HCP: bid 3♦, artificial
-    10-13 HCP with a singleton: bid 3♠, artificial, with a singleton in any suit
-    10-11 HCP no singleton: bid 3♣
-    12-13 HCP no singleton: 2N, artificial GF
-    12+ HCP with any singleton: 2N
-    12-15 HCP and a void: splinter with 3NT (♠ void), 4♣ or 4♦

The 2N response is an artificial GF with 4card support and opener rebids 3♦ with any minimum. With a non-minimum opener can show a distributional hand with 4+card suit on the 3 level:
   3♥: 4+♣, 6-4 or 5-5
   3♠: 4+♦, 6-4 or 5-5
   3N: 4+♠, 6-4 or 5-5
or opener can show a void by bidding that suit on the 4level (4♥ shows ♠ void).
Lacking extra distribution and a void, e.g. 5-3-3-2, 5-4-3-1, 6-3-2-2, 6-3-3-1 distributions, opener must rebid 3♣ showing a non-minimum.

1♥	10-22	5+card
1♥-2N	12+	4card support
1♥-2N-3♣	14+	non-minimum, no void, no side suit
1♥-2N-3♦	10-13	any minimum
1♥-2N-3♥	14+	4+♣, 6-4 or 5-5
1♥-2N-3♠	14+	4+♦
1♥-2N-3N	14+	4+♠
1♥-2N-4♣	14+	♣ void
1♥-2N-4♦	14+	♦ void
1♥-2N-4♥	14+	♠ void

(Note that Garozzo does not use high shortage first here, unfortunately.)

After 1♥-2N, 3♣ responder has 2 relays available: 3♦ asks for a singleton with SI, while 3♥ shows responder thinks game is the limit with his hand, i.e. about 12-16 HCP. When opener thinks slam is still possible, he can ask for responder's singleton with a relay of 3♠:

1♥	10-22	5+card
1♥-2N	12+	4card support
1♥-2N-3♣	14+	no void or side suit
1♥-2N-3♣-3♥	12-15	"I don't think it is slam"
1♥-2N-3♣-3♥-3♠		"but I think it is, show me your singleton?"
1♥-2N-3♣-3♥-3♠-3N		no singleton
1♥-2N-3♣-3♥-3♠-4♣		singleton ♠ (high shortage first!)
1♥-2N-3♣-3♥-3♠-4♦		singleton ♦
1♥-2N-3♣-3♥-3♠-4♥		singleton ♣

Note that when game seems to be the maximum achievable, no singletons are shown! This is a clever way to conceal the hands for the defenders. After 1♥-2N, 3♣/♦ responder can also introduce his own 5+ card suit. So to summarise: with 3card support and a 5card suit, responder first bids his suit and with 4card support and a 5card suit, reponder first bids 2NT.

After 1♥-2N, 3♣-3♦, (SI relay) opener shows his singleton in the same way: 3♥ shows no singleton and asks responder in turn to show his singleton. I am sure you can work out the answers by now (remember: high shortage first).

Game tries

Ambra has a clever way of using game tries. Say the auction starts: 1♥-2♥. Opener now bids 2♠ saying: "show me your cheapest suit in which you would have accepted a help suit game try?". Responder then bids a suit in which he has honour strength or he declines with 3♥ with an absolute minimum. An example:

```
K Q x          x x
A Q x x x      K x x
x              K J x x
A x x x        J x x x

1♥             2♥
2♠             3♦
3♥             p
```

3♦ is not what opener wanted to hear and he signs off in 3♥. With the minors reversed, opener would bid the excellent ♥ game.
The whole idea of this general game try is of course to conceal declarer's hand. Note that responder would have bid 2N with ♠ honours.
Opener can also show his hand with a short suit game try:

1♥	10-22	5+card
1♥-2♥	8-10	3card support or 3433
1♥-2♥-2♠		show me an accept suit
1♥-2♥-2N		singleton ♠
1♥-2♥-3♣		singleton ♣ (again no high-shortage-first here)
1♥-2♥-3♦		singleton ♦
1♥-2♥-3♥		asking for trump quality
1♥-2♥-3♠		6♥-5♠, SI
1♥-2♥-3N		natural, choice of games
1♥-2♥-4♣		5♣, SI
1♥-2♥-4♦		5♦, SI

2-over-1 bidding

An important principle in Ambra 2/1 bidding is that opener shows a minimum with or without 4card in the other major. 1♥-2♣, 2♦ shows 11-15 without a 4card ♠ and 1♥-2♣, 2♥ shows 11-21 HCP with a 4card ♠ suit. Also 1♠-2♣, 2♦: 11-15 no 4♥ and 1♠-2♣, 2♥: 11-21 with 4♥.

After 1♥-2♦, there is no room for this distinction and opener's 2♥ shows a minimum with or without 4card ♠. Other rebids by opener show 16-21 HCP hands:

1♥	10-21	5+card
1♥-2♣	9+	usualy 4+♣
1♥-2♣-2♦	10-15	no 4♠
1♥-2♣-2♥	10-21	4♠
1♥-2♣-2♠	16-21	4+♦!
1♥-2♣-2N	16-22	no side suit
1♥-2♣-3♣	16-21	5♥-4♣
1♥-2♣-3♦	16-21	6♥-4♣!
1♥-2♣-3♥	16-21	5♥-5♣, singleton ♠
1♥-2♣-3♠	16-21	5♥-5♣, singleton ♦
1♥-2♣-3N	16-21	5♥-4♣-4♦

Opener's jump rebids might look strange at first, but we will see the same bids a couple of times in the GAR convention.
After a 1♠ opening the schema is very much the same:

1♠	10-21	5+card
1♠-2♣	9+	3+♣
1♠-2♣-2♦	11-15	no 4♥
1♠-2♣-2♥	11-21	4♥
1♠-2♣-2♠	16-21	4+♦!
1♠-2♣-2N	16-21	5+♥ no side suit
1♠-2♣-3♣	16-21	5♠-4♣
1♠-2♣-3♦	16-21	6♠-4♣!
1♠-2♣-3♥	16-21	5♠-5♣, singleton ♥
1♠-2♣-3♠	16-21	5♠-5♣, singleton ♦
1♠-2♣-3N	16-21	5♠-4♦-4♣

If responder wants to check for a 4card ♥ with opener, he should bid 2♣! rather than a 4card ♦ suit he might have. That is the reason why after 1♠ the 2♣ response can be as short as a 3card: e.g. with ♠ Kx ♥ Axxx ♦ AQxx ♣xxx responder can bid 2♣.

1♥	10-21	5+card
1♥-2♦	9+	5+♦ or 3-7 with 3card ♥ support
1♥-2♦-2♥	11-15	4♠ still possible
1♥-2♦-2♠	16-21	5+♥-4+♠
1♥-2♦-2N	16-21	5♥, no side suit
1♥-2♦-3♣	16-21	4+♣
1♥-2♦-3♦	16-21	4+♦
1♥-2♦-3♥	16-21	6+♥
1♥-2♦-3♠		6♥-5♠, 4/5 losers

Note that 1♥-2♦, 2N shows 5-3-3-2 distribution, while 1♥-2♣, 2N can be a 5 or 6 card ♥ suit.

After a 1♠ opening the 2♦ and 2♥ responses are swapped around! The reason for this is to have more room for game investigation when responder has a ♥ suit. 2/1 responses to 1♠ are:

1♠	10-21	5+card
1♠-2♣	12+	3+♣, GF
	9-11	6+♣
1♠-2♦	10+	5+♥ !!, GF
	8-10	6+♥ !!
1♠-2♥	12+	5+♦ !!, GF
	3-7	3/4 ♠
	9-11	6+♦ !!

Rebids by opener after 1♠-2♦ are focussed on ♥ support. Because of the extra room created, opener can show his minimum and ♥ support below 2♠: 1♠-2♦, 2♥ shows 2-4 ♥ support and 10-13 HCP; 1♠-2♦, 2♠ shows a minimum without ♥ support. Other bids show 15+ as follows:

1♠	10-21	5+card
1♠-2♦	9+	5+♥
1♠-2♦-2♥	10-13	2-4 ♥
1♠-2♦-2♠	10-15	0-1 ♥
1♠-2♦-2N	15+	2+♥
1♠-2♦-3♣	16-21	4+♣, short ♥
1♠-2♦-3♦	16-21	4+♦, short ♥
1♠-2♦-3♥	13-15	3♥ or 5-4-2-2
1♠-2♦-3♠	16-21	6♠, short ♥
1♠-2♦-3N	11-13	4+♥, singleton ♦
1♠-2♦-4♣	11-13	4+♥, singleton ♣
1♠-2♦-4♦	11-14	5♥, singleton ♦
1♠-2♦-4♥	11-14	5♥, singleton ♣

Bidding after 1♠-2♥ is natural, with 2♠ showing a minimum and other bids showing 16-21 HCP.

Now we come to the question how responder bids with a strong minor suit. With the above agreements, responder has several bids available without a natural meaning, e.g. 1♥-2♣, 2♦-2♥ is not required to show ♥ support as responder would bid 3♥ with ♥ support. Some examples:

1♥-2♣, 2♦-2♥: relay, SI

1♥	10-21	5+card
1♥-2♣	9+	4+♣
1♥-2♣-2♦	10-15	any distribution without 4♠
1♥-2♣-2♦-2♥	17+	relay, SI
1♥-2♣-2♦-2♠	12-16	relay, GF
1♥-2♣-2♦-2N	12+	6+♣, GF+
1♥-2♣-2♦-3♣	9-11	6+♣, not forcing
1♥-2♣-2♦-3♦	12-16	6♣-4♦, not SI

Responder has: ♠ Axx ♥ Kx ♦ Qx ♣ AKJ10xx and opener opened 1♥. Responder has and old-fashioned SI 3♣ response. In Ambra responder bids 2♣ and when opener shows a minimum with 2♦, responder bids 2♥: relay with slam interest. Opener's rebids are similar to his 2nd round maximum bids:
    2♠: 5+♥-4+♦ !
    2N: 5+♥, no side suit
    3♣: 5♥-4♣
    3♦: 6♥-4♣
    3♥: 5♥-5♣, singleton ♠
    3♠: 5♥-5♣, singleton ♦
    3N: 5♥-4♦-4♣

The development after 1♥-2♣, 2♥ is:
    2♠: relay, no fit in ♠
    2N: relay with fit in ♠
    3♣: 9-11, 4♣, not forcing
    3♦: 6+♣, GF+

And after 1♥-2♣, 2♥-2♠ relay:
    2N: 6♥-5♠ or 5440 a 3♣r a 3♦: 5440 min   a 3♥r   a 3♠: void ♦
    3♣: 5-4   a 3♥: 6-5   a 3N: void ♣
    3♦: 6-4   a 3♠: 544 void ♦
    3♥: 5-4 sin ♦, 16+   a 3N: 544 void ♣
    3♠: 5-4 sin ♣, 16+

You should start to see the patterns in the relays by now, so you can work it out at the table.

An example from a practice game:

Kxx   Axx
AKJxx   Qxx
x   AKx
J10xx   Qxxx

1♥   2♣
2♦:min   2♠:r,GF
3♣   3♥:max, light invite
3♠:q   3nt:turbo, even (2) keycards
4♦:q   4♥:SO, no ♣ control
pas

1M-Reverse Relay (1MRR)

The bidding in this section applies to the opening of 1 major followed by a 2♣ rebid by opener, so these situations:
   - 1♥-1♠, 2♣
   - 1♥-1NT, 2♣
   - 1♠-1NT, 2♣

As usual in Ambra, these 2♣ rebids have multiple meaning: either natural or a "reverse" hand (17+ HCP).
Responder can bid 2♦ - relay - with 8+ HCP and when opener show a reverse, the bidding is GF.
Over this 2♦ relay, opener bids as follows:

1M-1♠/NT-2♣	11-21	natural or 17+ reverse (or 17+ and ♠ support for pd)
1M-1♠/NT-2♣-2♦	8+	1M-reverse relay
1M-1♠/NT-2♣-2♦-2M	MIN	5M-3+♣
1M-1♠/NT-2♣-2♦-2NT	16-17	BAL, 5-3-3-2
1M-1♠/NT-2♣-2♦-3♣	17+	5M-4♣
1M-1♠/NT-2♣-2♦-3♦	17+	5M-4♦
1M-1♠/NT-2♣-2♦-3M	17+	6+M
1M-1♠/NT-2♣-2♦-3NT	18-20	BAL, 5-3-3-2

This is the basic scheme, but there are a few extras, as opener's rebid in the other major has no natural meaning:

1. 1♥-1N, 2♣-2♦, 2♠ = "impossible ♠": 5+minor, 17+ HCP
2. 1♠-1N, 2♣-2♦, 3♥ = 4+♥, 17+ HCP
3. 1♠-1N, 2♣-2♦, 2♥ = "impossible ♥": 4+♣, 15-16 HCP

After 1♥-1♠-2♣, opener shows ♠ support – 3+card – by bidding 2♠. Responder then has a 2NT relay available:

1M-1♠-2♣-2♦-2♠	17+	3+♠ support
1M-1♠-2♣-2♦-2♠-2NT		support relay
1M-1♠-2♣-2♦-2♠-2NT-3♣	17+	3-5-1-4, 3card support, high sin
1M-1♠-2♣-2♦-2♠-2NT-3♦	17+	3-5-4-1, 3card support, low sin
1M-1♠-2♣-2♦-2♠-2NT-3♥	17+	6♥-3♠
1M-1♠-2♣-2♦-2♠-2NT-3♠	17+	4-5-2-2
1M-1♠-2♣-2♦-2♠-2NT-3NT	17-20	BAL, 3-5-(3-2)
1M-1♠-2♣-2♦-2♠-2NT-4♣	17+	splinter, 4card support, sin ♣
1M-1♠-2♣-2♦-2♠-2NT-4♦	17+	splinter, 4card support, sin ♦

(Again Garozzo does not use high-shortage-first here.)

1m-Reverse Relay (1mRR)

As was discussed in the section about the 1♣ opening, after 1♣-1♥, opener has a general reverse available with 2♦, showing a real reverse with 5♣-4♦ or 6+♣ with 17+ HCP or a hand with ♥ support and 17+ HCP. Responder's rebid in the 4th suit is again a relay (1mRR):

1♣-1♥-2♦	17+	with 4♦, 6♣ or ♥ support
1♣-1♥-2♦-2♠		1mRR
1♣-1♥-2♦-2♠-2NT	17+	5+♣-4♦
1♣-1♥-2♦-2♠-3♣	17+	6+♣
1♣-1♥-2♦-2♠-3♦	17+	6♣-5♦, 3-4½ losers
1♣-1♥-2♦-2♠-3♥	18-20	4♥, BAL
1♣-1♥-2♦-2♠-3♠	17+	5♣-4♥-4♠ (so you can be void for 2♦ bid!)
1♣-1♥-2♦-2♠-4♣	17+	5♣-4♥, sin ♠
1♣-1♥-2♦-2♠-4♦	17+	5♣-4♥, sin ♦

After 1♣-1♥-2♦-2♠-2NT, 3♣ is a further relay and opener bids:
3♦: 6♣-4♦
3♥: 3♥
3♠: St? ♠
3nt: to-play

After the 1♦ opening, opener's rebid of 2♣ is the false reverse and the 1mRR in the 4th suit works much the same (see the main diagrams for details). An important principle to remember is: when the 4th suit is available at the 2-level, other bids on the 2-level are weak and bids on the 3-level are 9/11 (when opener can still have 11-16 HCP). Therefore, also 2nt is not natural, but shows a weak hand that cannot be expressed otherwise. See for example the sequence 1♣-1♥-2♦-2nt: 4♦ !, 5/7 HCP.

3rd suit forcing relay (3SF)

A rebid by responder in the cheapest 3rd suit is forcing and a relay. The following sequences apply:
- 1♣-1♦, 2♣-2♥
- 1♣-1♥, 2♣-2♦
- 1♣-1♠, 2♣-2♦
- 1♦-1♥, 2♦-2♠
- 1♦-1♠, 2♦-2♥

In all these sequences opener rebids his suit and responder bids the cheapest 3rd suit. This bid is forcing and opener responds in much the same manner as in Checkback: showing support for responder and his strength.

Assuming the bidding starts 1x-1y, 2x-2w: opener's rebids are quite natural:
2y   = 3card suport (6card in opener's own suit), MIN
2z   = MIN or MAX, either 4card w or 4card z if still possible
2NT = MAX without support
3x   = MIN without support

See the next chapters for specific examples of this relay.

After 1♣-1♦, 2♣-2♥ the rebids are similar:
2♠ = "impossible ♠", MIN, 3♦
2NT = MAX, no 3♦
3♣ = MIN, no 3♦
3♦ = MAX, 3♦

When opponents intervene

This chapter deals with the situation where opponent overcall our opening bid. The Italians like to play a lot of transfers in those situations and Garozzo has implemented them into Ambra. In principle the double is a transfer to the next suit and so are other responses. A cue bid shows a good 5-5. Jumps to the 2 level are GF with a good 6card suit (no transfers). Jumps to 2NT and 3 level are transfers with a good 6card suit and invitational strength.
Let us work out the table after 1♣-(1♦):

1♣-(1♦)		
1♣-(1♦)-X	6+	4+♥ (but see 2♥ and 3♦ below)
1♣-(1♦)-1♥	6+	4+♠
1♣-(1♦)-1♠	8-10	balanced
	11+	without biddable suit on 1 level
1♣-(1♦)-1N	3-7 | 12+	5+♣
1♣-(1♦)-2♣	8-11	(4)5+♣
1♣-(1♦)-2♦	8+	5♥-5♠
1♣-(1♦)-2♥	12+	6+♥
1♣-(1♦)-2♠	12+	6+♠
1♣-(1♦)-2N	9+	6+♣
1♣-(1♦)-3♣	12+	5+♣, singleton ♦, GF
1♣-(1♦)-3♦	9-11	6+♥
1♣-(1♦)-3♥	9-11	6+♠
1♣-(1♦)-3♠	12+	balanced, transfer to 3NT
1♣-(1♦)-3N	12-15	to play

1♣-(1♥)		
1♣-(1♥)-X	6+	4+♠ (but see 2♠ and 3♥ below)
1♣-(1♥)-1♠	8-10	balanced
	11+	without biddable suit on 1 level
1♣-(1♥)-1N	3-7 | 12+	5+♣
1♣-(1♥)-2♣	3-7 | 12+	5+♦
1♣-(1♥)-2♦	8-10	5+♣
1♣-(1♥)-2♥	8+	5♠-5m
1♣-(1♥)-2♠	12+	6+♠
1♣-(1♥)-2N	9+	6+♣
1♣-(1♥)-3♣	9+	6+♦
1♣-(1♥)-3♦	12+	5+♣, singleton ♥, GF
1♣-(1♥)-3♥	9-11	6+♠
1♣-(1♥)-3♠	12+	balanced, transfer to 3NT
1♣-(1♥)-3N	12-15	to play

After 1♣-(1♠), we need the negative double to show a 4card ♥, so 1NT is natural, but from 2♣ onwards the transfer system is in operation again.

So what is the difference between 1♣-(1♥)-2♣ and 1♣-(1♥)-3♣ as both are transfer to ♦? With a weak hand or a GF hand with exactly 5♦ we would transfer with 2♣, passing of course with the weak variety and bidding on with the GF hand. With a 6♦ suit and 9+ HCP we would transfer with 3♣, passing with 9-11 and bidding on with 12+.

GENERAL PRINCIPLES FOR THE COMPETITIVE AUCTION

DOUBLE

Our doubles are generally all TO at all levels at least when doubler has not shown length in the suit. We use the PD at low levels only when one of us has shown given a penalty pass. In penalty situations when we know we have balanced hands and we hold a certain majority of the points we utilize the double to suggest partner pass with length in the suit. One doesn't make a double if one doesn't want partner to convert to penalty.

PENALTY DOUBLE (PD)

Despite the many TO doubles there are standard situations in which doubles are penalty :
a)   Partner has opened a preempt
b)   We have made a Penalty Pass over a TO double of a suit or NT bid higher than 1NT
c)   The double of a suit in which the doubler has shown 5+ cards
d)   We have already made a PD

DOUBLE WHEN WE HAVE FOUND A FIT

When we are in a forcing situation the double of an enemy suit shows a SGL in that suit . If this happens beyond the 3-level of our suit then double is invitation to slam. When the opponents bid their suit under the level of our cheapest competitive raise then the double shows extra strength or good defensive cards.
After two "PASSES" the double can be necessary with many types of special hands if one want to give partner the chance to convert to penalty.

The 1NT complex is from Ron Klinger's: "Bid Better, Much Better" and is called "Keri over 1NT".
We still follow the AMBRA rule that an impossible suit asks for a stopper.

3NT OVERCALL

When our side bids 3nt after an opponent's preempt we use TEXAS as invitation to slam .

APPENDICES

'GAR'

Every time that opener or responder shows a two-suiter one utilizes the structure called GAR:
as a RELAY one adopts the first step, and responses are :
]   3♣   = 5-4
]   3♦   = 6-4
When 5-5 or 5-4-4 are possible , then :
]   3♥   = 5-5 **SGL** high
]   3♠   = 5-5 **SGL** low
]   3nt = 5-4-4
Over responses of 3♣ and 3♦ one can make a further RELAY:
1° STEP = generic RELAY
2° STEP = RELAY + fixes the higher suit
The response to this RELAY are :
1° STEP = 2-2
2° STEP = **SGL** high
3° STEP = **SGL** low

In the cases in which the HCP range of the two-suite is not yet determined :
]   3♣   = 5-4 11/15 HCP
]   3♦   = 6-4 11/21 HCP
]   3♥   = 5-4-2-2 16/21 HCP
]   3♠   = 5-4 16/21 HCP **SGL** high
]   3nt = 5-4 16/21 HCP **SGL** low
After the response of 3♦ and the successive RELAY 3♥ we respond :
1° STEP = 11/15 HCP **SGL** high
2° STEP = 11/15 HCP **SGL** low
3° STEP = 16/21 HCP **SGL** high
4° STEP = 16/21 HCP **SGL** low

CHECKBACK STAYMAN

When opener rebids 1nt even over interference we use two conventional rebids 2♣ and 2♦ . 2♣ is a puppet to 2♦ in order to play 2♦ or it initiates an invitational sequence . 2♦ is always a GF RELAY that asks distribution
Let's see the structure :

'2ntT' STRUCTURE

Applies after a 1-over-1 response and opener rebids:
- 1♠ or
- 1nt or
- his own minor or
- responder's minor.

A subsequent 2nt rebid my responder is 2ntT (see diagrams for examples).
This convention forces opener to bid 3♣ over which responder can :
a) Pass with 4x-6+♣ (Exceptionally with 3+♣ if opener has shown ♣)
b) Bid a new suit at 3 level showing 5-5 GF
c) Repeat one's own suit with 5x-5♣ GF
d) Bid 3nt showing solid or near solid suit, and light SI
e) Make a cue-bid with a solid or semisolid suit and strong SI
f) FIT 4° in 2° suit of partner SI with **SGL** ÚÚÚ Bid it at the four-level

TURBO CONVENTION

RKCB is practically discarded by the system, substituting instead TURBO
How does it work ?
After the trump suit has been set, all the bids are Cue Bids and 4nt represents a BYPASS . When the bidding approaches 4NT one bids 4nt if one possesses and even number of keycards (4 Aces + King of trump) 0/2/4 while BYPASSING 4nt with an odd number of keycards 1/3/5.
To play the small slam requires four keycards, and the grand requires all five.
The problem is that only one of the players has a count on the keycards , therefore if all the keycards are present then one needs to transmit this information to partner by continuing to cue-bid.
When trumps are fixed in a major suit at the 3 level then 3nt becomes TURBO and a successive 4nt shows the Q of trumps
When a minor is fixed below 3nt and one of the two partner's goes above 3nt, 4 of the fixed minor becomes TURBO

THE COMPETITIVE AUCTION AFTER AN OPENING

General rules we adopt over all openers :
a) Use in competition of the convention **Good-Bad 2NT**
b) Redouble by responder is GF
c) Double with a raise (only at the 2-level) which shows exactly 3 in partner's suit or a strong hand
d) The direct cue-bid is always two-suited if made by responder , while if made by opener shows a FIT in partner's suit but might not have a singleton in the cued suit, especially if made at the 2-level
e) The jump-cue shows a splinter, with a FIT
f) Over two-suited intervention the cue of the 1°available suit shows a FIT for opener's suit and is at least invitational , while the cue-bid of the 2° suit shows 5+ carte in the remaining suit, and is GF at least
g) The double and then raise , at the two or three level , in opener's suit by his partner shows a limit hand with 9/11 HCP ; while the double then raise to four of a minor is always GF !
h) The cue of an enemy suit after we have both shown a suit shows a FIT in the last bid suit , a strong hand and certainly a **SGL** in their suit; while whenever both have shown a suit the double followed by a cue is invitational to play in NT
i) The jump to 2nt after our opening and interference at the one-level shows a FIT in the opening suit at least 4° and 10+ HCP . In the cases of the opening 1♣ or 1♦ , 2nt promises something in the enemy suit , while over the opening 1♥ , 2nt shows only points and aFIT
j) When the opponents interfere in a suit we use the concepts of **RUBENSOHL** , therefore the bid of a new suit at the 2 level after opener has bid and enemy interference by RHO shows at least a 5° suit , but generally 6° , and is passable , and this shows at maximum 10 HCP but might not be passed. Therefore if one is strong with at least a 5 card major one needs first to double and then show the suit the next round . From 2nt up are all transfers, at least invitational, with generally at least a 6-card suit.
k) Use of **RUBENSOHL** every time with 1nt opener and natural interference, sometimes even at the two-level (1nt**]** 2♥ = Natural **]** Rubensohl   ) . This convention one uses even after an opening 1♣/♦/♥ and jump interference of 2♦/♥/♠ understanding that opener often has a balanced 12/14HCP

WORKINGS OF RUBENSOHL

Rubensohl adopts the following rules used in practically all situations :
Ú Double is generally **STAYMAN** over interference of a minor ; over major suit interference it is optional and shows at least 8/11 HCP generally with a useful hand
Ú The response 2 of a suit is natural and competitive, but not forcing (could have just 3 HCP)
Ú The responses 2nt/3♣/♦/♥ are all **TEXAS** including the cue-bid of their suit

Ú The **TEXAS** responses can be:
a) Strong or weak, if the suit was not biddable at the 2 -level
b) Strong or intermediate, but not weak if the suit was biddable at the 2-level
Ú Response of 3♠ is a natural 5-card suit GF, without a stopper
Ú 3nt is natural, with a stop
Ú **TEXAS** cue-bid assumes many meanings . Basically partner completes the transfer without a Stop while making a descriptive bid with a stop
EXCEPTION : If the opps have shown spades ♠ then the response 3♥ shows an invitational hand with ♥
while the response 3♠ shows a GF bal hand , 4♥
The transfer cue is **STAYMAN** which is used to look for at least one 4[a] major or a stop in their suit. Partner responds :
a) Completes the transfer ÚÚÚ I **DON'T** have a stopper, but could still have a 4 card major ! ÚÚ Now responder starts looking for a fit in a suit knowing the lack of a stopper.
b) Bid a major ÚÚÚ I have a stop, and this four-card major
If partner of opener has shown a hand at least invitational the simple completion of the **TEXAS** tells partner to pass in the case of an invitational hand. Therefore opener with a maximum or a good fit FIT should not just complete the **TEXAS** but look for another descriptive bid
We provide an example, in closing :

N	E	S	W	
1nt	]	2♦	]	X	= **STAYMAN** but not GF , perhaps 6/9 HCP with 4♥-4♠ possibly 6♣ 7/9 HCP
			]	2♥	= 5+♥ Natural competitive
			]	2♠	= 5+♠ Natural competitive
			]	2nt	= **TEXAS** for ♣ Weak or Strong
			]	3♣	= Cue **TEXAS,** GF bal
			]	3♦	= 5+♥ GI or GF
			]	3♥	= 5+♠ GI or GF
			]	3♠	= 5♠ GF without a stopper in ♦
			]	3nt	= Natural

DESCRIPTION OF GOOD-BAD 2NT CONVENTION

1°) **When is it used ?** Whenever one is in a competitive situation at the 2-level and our RHO has not passed, so has bid a suit or doubled or redoubled (ATTENTION and it isn't a forced bid) . For the moment we only use it when our side has opened.
2°) **Why ?** It shows a minimum, but unbalanced hand (like if two-suited at least 5-5 or one-suited with a good 6+ cards but weak in points) ; one should not bid it with just 5-4 if partner has not promised the suit (e.g. after 1♣-1♠- X = shows 4♥ most of the time)
3°) **How does responder bid in response to the convention ?** If not possessing a GF hand bid what gets you to the best partial : always bid a suit lower or equal to opener's suit. If you happen to have a GF hand, cue-bid to show a generally balanced hand with interest in playing 3nt but without a stop in the opponent's suit . Else one can show one's own suit of at least five-cards and force to at least game
4°) **What does this imply ?** It implies that all bids at the 3-level (including repeating opener's suit) are always constructive and in the case of partner having already doubled (showing a strong hand), is GF

2§ RELAY

After openings of 1♣ or 1♦ and responses of 1♥ or 1♠ responder can make a RELAY of 2♣ ; opener rebids :
2♦   = 3° raise of partner's suit, **MIN** or **MAX**
2♥   = No raise and **MIN**
2♠   = No raise **UNBAL MAX**
2nt   = No raise **BAL MAX**

RULES :
Opener goes past the four steps only with particular hands. If opener has shown support, a cheap rebid is not forcing. Over the 2° and 3° steps the RELAY is always the next step . If opener has shown a MAX all bids are GF . Responder, in order to show a hand with slam interest must go through the RELAY !!
EXCEPTION : One can show slam interest by raising the 2° suit of opener to the three-level or jumping to the 3-level in ones own suit after having been given a raise.

OVERCALLS

SUIT OVERCALL

RULES FOR RESPONDING TO THE OVERCALL

1) Up to the cue they are **F1**
2) Starting at the cue, all bids are competitive or strong
3) NT bids remain natural
4) Jump shifts indicate a 6-card suit and are invitational
5) Jumping to 2nt over 1♥/♠ is conventional (©) and shows a FIT at least 4° and points

RULES FOR OVERCALLER

OVER A NATURAL RESPONSE F1
1) One rebids naturally , repeating one's suit is the weakest bid
2) NT bids show a stopper and normal hand
3) Cue indicates a **MAX** and FIT nearly always, for partner's suit
4) The raise shows a normal hand with a FIT
5) Jump cue is a **SPLINTER** and with at least 3° to an honor (much better 4°) or 4 small cards and a decent hand
6) New suits denote a good hand, canape if 1M then 3m , and long-short if 1M then 2m, and if 2m then 2M it is a distributional hand with not too many points only if the major could have been bid at the 1-level.

RESPONDING TO THE TRANSFER
1) Completing the **TRANSFER** indicates a normal hand in general with a minimum FIT, or one can repeat a 6-card suit or bid a new suit
2) Jump-change of suit is SPLINTER in a **MAX** with FIT with honor 3° or with 4 small
3) The change of suit indicates a normal hand, with or without a FIT
4) 2nt shows a bal hand **MAX** with stop without a great FIT
5) The cue shows a **MAX** with FIT
6) Jump cue shows a **MAX** with a great FIT and **SGL** in opener's suit

RULES FOR THE RESPONDER

1) After completing the **TRANSFER** the change of suit indicates a good hand
2) Bidding NT indicates a good hand with a stop indicano una bella mano with stop
3) The raise shows an invitational hand
4) The cue asks for a stop , but if followed by a raise shows a control
5) If overcaller does not complete the **TRANSFER** repeating the suit shows a weak hand

IF OPENER'S PARTNER DOES NOT PASS

CASE A : Opener's partner offers a raise
EX.

In this case we apply **RUBENSOHL** , which means the suits at the 2-level are competive to play while 2nt and above are all **TRANSFER** competitive invitational and forcing . The double in this situation shows the desire to compete somewhere, without a great fit for partner.

CASE B : Opener's partner bids NT
EX.

1x	]	1y	]	2z	]	?
1x	]	2y	]	2z	]	?

In this case we use **RUBENSHOL** ; the double remains TO showing a hand of at least 8/10 HCP without a great FIT in partner's suit and confirms a four-card suit , usually five , if the new suit was not forcing ; but if the change of suit is forcing the double assumes a conventional meaning: FIT 3° in partner's suit and strength in a 4° suit

What meaning could the extra cue have now?

We agree that the cue of the first suit shows a FIT 3° with points while the cue of the second suit shows FIT 4° and points.

EX.

N		E		S		W	
1x	]	1y	]	1z	]	2x	= three-card raise, 9/10+ HCP
					]	2y	= Normal competitive raise
					]	2z	= 4+ card raise, 9/10+ HCP
					]	3y-1	= Mixed 4-card raise, 7/9 HCP

From 2nt and up we use the concepts of **RUBENSHOL**

EX.

N		E		S		W	
1x	]	1y	]	2z	]	2x	= 3-card raise 9/10+ HCP if there isn't space at the 2-level this hand goes through double
					]	2y	= Normal competitive raise: 3card, 6/9 HCP
					]	1ᵃ cue available via **TRANSFER**	= at least 4card raise and 9/10+ HCP
					]	2ᵃ cue available via **TRANSFER**	= mixed raise, 4card in y, 7/9 HCP
					]	3x-1	= mixed 4card raise, 7/9 HCP
					]	3y	= **M**

In general we don't go to the 3-level voluntarily with only an 8-card FIT; if there is space for an economic cue at the 2-level we use it with 10+ HCP and the 3° raise goes through the double first

From 2nt up one uses **RUBENSHOL** but with a particularity with the cue-bid **TRANSFER**
an example to better understand :

N		E		S		W	
1♦	]	1♠	]	2♣	]	X	= TO not with 3♠
					]	2♦	= raise with 3♠ (9)10+ HCP
					]	2♥	= 5+♥ NF
					]	2♠	= normal competitive raise
					]	2nt	= 4+♠ 10+ HCP
					]	3♣	= mixed raise 4♠ 7/9 HCP
					]	3♦	= **TRANSFER** 6+♥ GI or GF
					]	3♠	= **M**

Another example :

N		E		S		W	
1♣	]	1♥	]	2♦	]	X	= TO possibly 3♥
					]	2♥	= Normal
					]	2♠	= 5+♠ NF
					]	2nt	= 4+♥ 10+ HCP
					]	3♣	= 4♥ 7/9 HCP
					]	3♦	=
					]	3♥	= **M**

Another

N		E		S		W	
1♥	]	2♣	]	2♦	]	X	= TO
					]	2♥	= 3+♣ 10+ HCP
					]	2♠	= 5+♠ NF
					]	2nt	= (3)4♣ 7/9 HCP
					]	3♣	= **M**
					]	3♥	= 6+♠ GI +

If not yet understood …..

N		E		S		W	
1♣	]	1♥	]	1♠	]	1nt	= Natural
					]	2♣	= 3♥ (9)10+ HCP
					]	2♦	= 5+♦ NF
					]	2♥	= Normal
					]	2♠	= 4+♥ 10+ HCP
					]	2nt	= 4♥ 7/9 HCP
					]	3♣	= 6+♦ GI+

… and finally

N		E		S		W	
1♦	]	1♠	]	2♥	]	X	= TO can be 3♠
					]	2♠	= Normal
					]	2nt	= 5(6)+♣ GI+
					]	3♣	= 4+♠ GI+
					]	3♦	= 4♠ 7/9 HCP

CASE D : Opener's partner gives an negative double ES.

N		E		S		W	
1x	]	1y	]	X	]	?	
1x	]	2y	]	X	]	?	

The redouble shows a major honor in partner's suit
All new suits at the 1 or 2 level are weak and misfit in partner's suit
From 2nt up is **RUBENSOHL** but with a particularity in the cue-bid **TRANSFER .**
The bid of 1nt can have two meanings : 1) Natural 2) weak misfit and other two suits

CASE E : Opener's partner cue-bids the overcall
In this case we use the inverted double: double = I don't have top honors; pass = I have a major honor
From 2nt up we use Rubensohl asking for the lead in the shown suit.   An example to understand better:

N		E		S		W	
1♥	]	1♠	]	2♠	]	pass	= I have at least a major honor
					]	X	= I don't have a major honor
					]	2nt	= Asks for a ♣ lead (could perhaps have a FIT ♠)

RESPONSES TO THE TAKE-OUT DOUBLE

Our TO X guarantees at least 7 cards in the majors over opener's minor while over opener's major shows at least 3 cards in the other major

Therefore the double could be 5-4 minors with 3 cards in the other major and obviously these hands are not that strong.

The scheme is quite simple, thought it may look complicated ; Bidding NT is natural , while bidding a suit cheaply is natural and weak. From the cue-bid up is TRANSFER to the next suit including the cue-bid, but this transfer is never an unbalanced GF. The purpose of these conventional responses is in order to TRANSFER to a minor and then , after completing it, a change of suit is an invitational hand .

EX.

N		E		S		W		
1♥	]	X	]	P	]	3♣		
P	]	3♦	]	P	]	3♠	= 5♦-4♠ invitational	

Completing the **TRANSFER** by doubler shows a normal hand, otherwise with a max hand and FIT one super-accepts by bidding natural values; the jumps are SPLINTER with FIT if in opponent's suit, otherwise showing a long decent suit with FIT and a good hand.

OVERCALLING 1NT

OVERCALLING IN 2ª POSITION

Overcalling 1nt is like our opening 1nt and shows 15/17 HCP and " generally " little interest in majors , therefore over opener's major it "tends" to exclude the other major
The continuations are the same as over an opening 1nt
CASE A : Opener's partner passes

N		E		S		W	
1x	]	1nt	]	P	]	2♣+	= System ON

CASE B : Opener's partner doubles for penalty

N		E		S		W

SPECIFIC CASES WHERE WE USE RUBENSOHL AND LEBENSOHL

In general the RULE is: we use Lebensohl when we have shown a weak hand by passing before and we play Rubensohl with unlimited hands.

CASE A :
If opener's partner does not pass over our TO double :

N		E		S		W	
1x	]	X	]	2x	]	X	= TO
					]	?	= As if partner has opened 1nt and they have overcalled 2x . We use **RUBENSOHL**

CASE B :

In case of :

N		E		S		W
1x	]	P	]	2x	]	X

NB : Continuations are analogous to over 2♠(Weak two)] X] P] ?

CASE C :
We use Rubensohl even over a double of a weak two by the opponents
ES.

CASE D :
We use Rubensohl even when the opponents open with weak 1nt and partner doubles showing a balanced hand :
EX.

N		E		S		W	
1nt	]	X	]	2x	]	2y	= Competitive
					]	X	= PD

In these cases we use Rubensohl , so the suits at the 2 level are competitive to play while 2nt and up are all TRANSFER competetive, invitational or strong.

CASE E :
We use Rubensohl even when we open 1x and the opponents jump overcall 2y natural
ES.

THE OPPONENTS OPEN 1NT

CASE A : Opening strong NT, i.e. 15+ HCP
After a strong 1NT opening we overcall purely competitively ; could be weaker in balancing seat

double =	One -suited , any suit : partner must bid 2♣ (unless having a super FIT in ♣) , and we pass with ♣ or bid our suit
2♣ =	Two suited 4+♣-4+x
2♦ =	Two suited 4+♦ -4+♥/♠
2♥ =	Two suited 4+♥ -4+♠
2♠ =	Natural , weaker than double then 2♠

The only forcing response is 2nt but this shows a <u>really</u> interesting hand! ! In general one responds in Paradox style , which menas bidding the suit you don't have, in pass/correct fashion

After overcalling 2♣ :

N		E		S		W

	]	3♦		= bad hand ♦-♠

OVERCALLING ILLOGICAL 1NT

Overcalling illogical 1nt always shows at least 9 cards in the 2 other suits with at least (7)8+ HCP

N		E		S		W	
1x	]	P	]	1y	]	X	= Shows 4-4 in the other suits (not guaranteeing opening strength !!!) or
							a strong hand 16+ HCP
					]	1nt	= Shows 5-4 or 5-5 in the other two suits

How does overcaller bid now ?

Over a cue of the lower suit obviously bid your longer suit.

But over the cue of the higher suit bid Ú Ú   ] 2nt = 5-5
                                          ] 3z(lower suit) = **MIN**
                                          ] 3w(higher suit) = **MAX**

Over 2nt one bids Ú Ú Ú Ú Ú   ] 3x/y = 5-5 and **SGL** in the suit
                                  ] 3z(lower suit) = **MIN** Ú Ú Ú   ] 3nt = Asks for longer suit

GHESTEM

GHESTEM is a two-suited overcall made over a NATURAL opening of one of a suit. The style in which we bid this depends on the position, vulnerability, and whether partner has passed or not !

Opposite passed partner and white vs red the bid is generally defensive/obstructive, while vulnerable against not vulnerable it is generally constructive with good suits and 5 losers or less.

Remember that you never promise the suit you bid.

RULES :
1) Returning to trump is always the weakest bid
2) Jumps in a suit shown by partner are always preemptive
3) To show GI+ hands one uses the available space, so if one bids the lower suit one shows a FIT in the lower available suit at the 3-level. This is above all for the minor suits .
4) 3nt is always natural

DRURY

DRURY is played when partner opens a Major in third hand, which can be a light opening (9+) and a 4card suit. The responses of two clubs and two diamonds both are invites with three and four trumps respectively.
